DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/27/2009 has been entered.

Allowable Subject Matter

2. Claims 1-12 and 14-27 are allowed.

Regarding Claim 1, Mallory, Campana, Keskitalo, and Alanara do not teach, alone nor in combination, the combination of:

Processing a plurality of received transmissions from a plurality of signal sources to recover a message and if the message cannot be recovered error-free from a single received transmission,

determining erased frames in a message recovered from a first received transmission,

determining good frames recovered from remaining ones of the plurality of received transmissions,

forming at least one combined message, wherein each combined message includes a particular combination of good frames substituting for the erased frames, and

checking each combined message to determine whether it is good or erased.

Art Unit: 2618

Regarding Claim 18, Mallory, Campana, Keskitalo, and Alanara do not teach, alone nor in combination, the combination of:

Processing a plurality of non-synchronous forward link received transmissions from a plurality of signal sources to separately recover a page message and if the page message cannot be recovered error-free from a single received transmission,

determining erased frames in a message recovered from a first non-synchronous forward link received transmission, based on a set of cyclic redundancy check (CRC) bits included with each frame,

determining a good frame, recovered from one of the plurality of non-synchronous forward link received transmissions, for each erased frame,

forming a combined message by substituting each erased frame with a corresponding good frame, and

checking the combined message based on a set of CRC bits included with the message to determine whether it is good or erased.

Regarding Claim 19, Mallory, Campana, Keskitalo, and Alanara do not teach, alone nor in combination, the combination of:

a decoder operative to process each of the plurality of symbol streams from a plurality of signal sources separately to recover a respective message comprised of a plurality of frames;

a first detector operative to detect each frame in each recovered message as either a good frame or an erased frame;

a second detector operative to detect each recovered message as either a good message or an erased message; and

a frame assembler operative to form at least one combined message, if a message cannot be recovered error-free from a single symbol stream, wherein each combined message includes a particular combination of good frames substituting for erased frames in the message recovered from a first symbol stream, and

wherein the second detector is further operative to detect each combined message as either a good message or an erased message.

Regarding Claim 26, Mallory, Campana, Keskitalo, and Alanara do not teach, alone nor in combination, the combination of:

means for decoding each of the plurality of symbol streams from a plurality of signal sources separately to recover a respective message comprised of a plurality of frames;

means for detecting each frame in each recovered message as either a good frame or an erased frame;

means for detecting each recovered message as either a good message or an erased message; and

means for forming at least one combined, message, if a message cannot be recovered error-free from a single symbol stream, wherein each combined message includes a particular combination of good frames substituting for erased frames in the message recovered from a first symbol stream, and wherein each combined message is detected to determine if it is a good message.

Claims 27 is allowable for similar reasons as claim 26.
